Tyres

Apart from checking your vehicle’s tyre pressures (including the spare) regularly, it is important for you to monitor the tread depth and wear pattern on your tyres.

If tyre tread wear is uneven, it is likely that your wheels require alignment.

In this case, book your vehicle into one of our Accredited Tyre Suppliers to have your wheels aligned correctly. As with all servicing and maintenance, notify the supplier that the vehicle is managed by Webfleet.

All tyres have built in tread wear indicators. This is a bar which appears across the tread. If your tyres have worn to the tread wear indicator they must be replaced promptly. It is advisable to replace your tyres when they are very close to, but have not yet reached the tread wear indicator.
