Describe briefly the areas in which you feel you can be most helpful in providing mentorship. (Try to be as specific as possible to help us with mentor/mentee matching)

Are there any aspects of your work situation that we need to take into account in assigning you a mentee such as having a very busy timetable, or doing very confidential work or going away for periods of the year.

Is there any characteristic in a mentee that would make a match uncomfortable for you?

Other considerations: is there anything else you would like to add to your application information to assist us in the pairing process?

Would you be prepared to act as a mentor form more than one person? If yes, how many?
