figshare for institutions

Federation University Australia has partnered with figshare, an easy-to-use research data management platform, that allows you to make your research data and non-traditional outputs citable, shareable and discoverable.

✔ **A cinch**

Upload your research data and files in under five minutes.

✔ **Comprehensive**

Upload any file type and access it from anywhere.

✔ **Controlled access**

Not all data can be made fully open access. You can set access restrictions on your data if needed.

✔ **Citable**

Receive credit for all your outputs. Give your data a permanent web link (DOI) so you and other authors can link directly to it from future papers and make it citable.

FedUni.figshare makes it easy to get recognition for your data, raise the profile of your research and comply with funder and publisher policies.

FedUni.figshare

You now have somewhere to store your completed research datasets

✔ **Raise the profile of your research**

✔ **Receive recognition for your data and non-traditional research outputs**

✔ **Potential increase in citations and impact**

✔ **Comply with funder and publisher policies**
