What is this document for?

From 2021, the program structure for most* Bachelor of Psychological Science students has two components: core psychology courses and electives. This document is intended to help you select your electives.

It is organised into two sections. First, it outlines what electives are, and offers some guidance on selecting these courses, and other important pieces of information. Second, it provides tables of possible courses and course sequences for you to select, grouped into disciplines.

It is important to note that these tables do not provide an exhaustive list of possible options for electives, as is explained in the information below. But they are a great place to start.

** There are some students who are in previous program structures.*

What are electives?

In HY5, an elective is any 15-credit point courses offered by the university. The 2021 HY5 program structure requires that you complete eight elective courses: 4 in first year, 2 in second year, and 2 in third year. You can select your electives from the courses in the lists in this document. However, you are not limited by the courses contained in these lists. Each School in the university provides lists of courses offered, and Course Outlines so you can read about them. You will find these lists on the Federation University website, under each of the schools, and in the Student Resources area.

How do I choose electives?

There are plenty of options to choose from for your electives, which is great as it gives you a great amount of variety with what you can study, however all that choice can make choosing difficult.

We'd encourage you to select courses in a sequence or stream of courses from one or two disciplines. This gives you the opportunity to 'value-add' to your degree by having another area or two of specialisation. Think about vocational interests, possible career pathways, or even general interests that you would like to explore and select courses in related areas that will enhance your transcript. If you are unsure, you can use your first year electives, to explore a range of different disciplines, and then you may choose to follow a particular stream for your second and third year study.

When you look through the lists of courses sequences below, you will notice that the number of courses in each sequence varies. Thus, you may not be able to complete all your electives in a particular discipline. If so, you can pick courses from a second sequence, or individual courses from streams, as long as you satisfy the pre-requisites.

Pre-requisites are courses you must have completed before you can complete your chosen course. Many courses, especially intermediate (coded 2000) and advanced courses (coded 3000) have pre-requisites. Thus, if there is a course you would like to do, you might have to do another course first. Additionally, some courses also have exclusions. Exclusions are courses that prevent you from enrolling into another course. For example, an exclusion for PSYCB 2105 is BEHAV 3004. If you have completed or are currently enrolled in BEHAV 3004, you are not permitted to enrol into PSYCB 2105.

Important notes for all students

- To find out more about each course, look up the Course Outlines in the 'Student Resources' section of the relevant schools home page (listed in the tables below).
 - If you still have questions about a course, please contact the school that is responsible for that course
- The options for electives vary between campuses, although any student can take online courses (ODL)
- Courses vary in how they are delivered.
 - For example, some are fully online (ODL), some are a combination of online and face-to-face components, and a few have lectures and lab classes
- It is the students' responsibility to double check pre-requisites and exclusions
- Every effort has been made to ensure the course details below are correct. On occasion, however, some details may change.
- The courses in each sequence may vary from year to year

If you have any questions, please contact the HY5 Program Coordinator:
