Resource development and support

High-quality resources are important in both face-to-face and online courses to enhance and cater for a range of student learning styles. CLIPP multimedia staff provide educational resource development, design, guidance, training and delivery for staff to enable provision of Effective, Sustainable, Accessible and Engaging (EASE) resources to our students.

Design services

Do you have concepts that are difficult to grasp that you want to present to your learners in a visual way? Do you have an idea of how to convey this but want help in developing?

The CLIPP team offer professional graphic design services specifically for the creation of educational resources for learning purposes such as: illustrations; diagrams; flowcharts; graphical elements to enhance presentations, Moodle lessons or books; instructional booklets, flyers and posters.

Video production services

The CLIPP team specialise in generating complex, high production value re-useable videos and complex animations for learning purposes, including: program, course and assessment introduction videos, course material videos, animation - 2D and 3D diagrams, motion graphics and visualisations, short exemplar films, green screen filming and DVD authoring.

This service is labour intensive and in high demand so capacity is limited. Planning in advance is highly recommended. If you need any assistance in resource development, graphic enhancement, course introduction videos or video and animation development please contact CLIPP.
Embedded academic and digital literacies

Do your students struggle with essay writing, referencing or need some support to engage with a FedUni learning technology? Our Learning Skills Advisors (LSAs) can work with you to embed academic and digital literacies support into your program in both the online and face-to-face contexts.

We have embeddable Moodle ‘modules’ of content and activities to support learners. Our LSAs can work with you to customise these to the requirements of your course.

For more information: www.federation.edu.au/lsa

Learning technology assistance

CLIPP provide assistance in the use of our supported learning technologies such as Moodle, Mahara, Turnitin, Camtasia, streaming video (Tube) and virtual classroom technology to name a few.

For support please visit our eLearning hub (www.federation.edu.au/ehub) in the first instance to view our extensive catalogue of self-help support resources, or contact the Service Desk (servicedesk@federation.edu.au) to log a request for support. Be sure to include CLIPP and the name of the technology you want assistance with in the subject line and specify the question or issue you need assistance with.

eLearning hub

The eLearning hub is a staff repository of tools, resources, guides, advice and links relevant to eLearning. It provides support on the following tools:

- Equella
- Moodle
- Preventing plagiarism (Turnitin)
- Flipped classrooms
- ePortfolio (Mahara)
- Screen recording (Camtasia)
- Creating videos and screencasts
- Creating surveys (Lime Survey)
- Virtual classroom (Blackboard Collaborate)
- Virtual classroom (Adobe Connect)
- Streaming video (Tube)
- Audio recording (Audacity)
- Graphics and design
- Copyright services
