Researcher Development Program Overview 2024

Following programs will be offered in 2024. Additional sessions will be offered as they become available throughout the year.

Program/Activities	Description
Academic Research Mentoring Program	Mentoring program aims to support high-potential early and mid-career researchers at Federation University around their strategic career and leadership journey. It also provides current academic leaders the opportunity to develop their mentorship skills and to make a positive impact in the career of junior researchers.
Advancing Your Research Career	Advancing your Research Career supports researchers in taking a reflective and strategic approach to developing and managing their research careers and becoming a research leader – an expert, a skilled colleague and collaborator, a leader of teams, projects or programmes of research.
Campus Plus Webinars	The series of one-hour live webinars are tailored to assist University personnel achieve better industry engagement and commercialisation outcomes.
Competitive Grant Support Program	Competitive Grant Support Program (CGSP) aims to assist researchers in submitting Category 1 funding applications.
Early Career Researchers (ECR) Network	ECR network aims to provide ECRs with opportunities to expand networks, share knowledge and access support during the early phase of research career.
Research Impact Training	Research Impact: Creating Meaning and Value provides a broad introduction to impact, providing researchers with the essential knowledge and skills they need to ensure that impact is embedded in every step of the research journey.
Research Integrity Training	Research Integrity training provides a comprehensive overview of how researchers can meet their responsibilities, setting out the key principles and practices of good research conduct, and guiding learners through the lifecycle of a research project.
Research & Researcher Development Sessions	Sessions/Workshops hosted on various topics related to research management, academic and research skills, industry engagement and personal and professional development.
Research Writing Retreat	Research writing program provides a dedicated writing space and time to encourage researchers for timely completion of their research papers.
Supervising Doctoral Studies	Training in the core principles and practices of doctoral supervision to equip supervisors to support doctoral candidates' development.
