In 2010 UB’s paper savings were the height of the Empire State Building in New York. In 2011 UB reduced paper consumption by a further 21%. That’s a saving of 4,453 reams of paper.

To put 4,453 reams into context, the 2011 paper savings are the equivalent of 55 pallets of paper. That’s over 2.2 million pieces of paper.

More Departments are Choosing Recycled paper

More Departments are making the switch to recycled paper. Virgin paper has a considerably larger environmental impact, from cutting down trees to the large amounts of bleach, water, oil, air pollution and greenhouse gas emissions. By choosing recycled paper you’ll help to keep trees in the ground and reduce UB’s environmental impact.
