Formal Semester Start Date:	This is when the semester officially commences on the University calendar.
Census Date:	This is the last date you can 'drop' a subject from your enrolment for that semester and not be charged for the subject. 'Dropping' a subject will remove it entirely from your transcript of results and fee invoice for the semester. Please note that you can no longer personally remove the final subject from a semester. If you are enrolled in one subject only in a given semester, this will need to be 'dropped on your behalf'.
End of Semester:	This is when the semester officially concludes on the University calendar.
Assessments Due:	This is the final date to submit your assessments for the semester, and is available on your course description. Late assessments will only be accepted if you have applied for Special Consideration and received an extension to the due date. Students who have not submitted by this date automatically receive a fail grade for the subject. If you anticipate not being able to complete by the date specified on your course description, it is advisable to 'drop' the subject from your enrolment, but be mindful of when it will next be offered.
Results Published:	This is the date that your results will officially be released via your MySC account. Results go through a formal approvals process at the Faculty level once they have been marked by coordinator, and cannot be released prior to this date.

If you do not have access to enrolment in each of these terms, please email info@federation.edu.au with your student ID number and advise that you do not have access.
